

Usa le linee numerate per rispondere alle domande.

Risposte

- 1) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{6}{6}$?

- 2) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{1}{4}$?

- 3) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{0}{2}$?

- 4) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{6}$?

- 5) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{2}$?

- 6) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{6}$?

- 7) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{8}{8}$?

- 8) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{8}$?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____

Usa le linee numerate per rispondere alle domande.

- 1) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{6}{6}$?

- 2) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{1}{4}$?

- 3) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{0}{2}$?

- 4) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{6}$?

- 5) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{2}$?

- 6) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{6}$?

- 7) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{8}{8}$?

- 8) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{8}$?

**Risposte**1. $\frac{3}{3}$ 2. $\frac{2}{8}$ 3. $\frac{0}{6}$ 4. $\frac{1}{3}$ 5. $\frac{8}{8}$ 6. $\frac{2}{3}$ 7. $\frac{4}{4}$ 8. $\frac{1}{2}$
